

The WESCO Integrated Supply e-Commerce Catalog was created to enhance our customers experience with respect to the research, comparison, selection and requisition of products that are complimentary to support maintenance and operations. The intent is to provide a simpler, yet comprehensive, channel for direct charge and spot buy purchases, giving procurement leaders the data, controls, and transparency required to best manage costs.

WESCO has created a robust catalog of fully attributed, MRO products across 13 categories that is accessible via punchout, mobile app, or more traditionally, WESCO's proprietary browser-based e-Crib and Rapid-Req software:

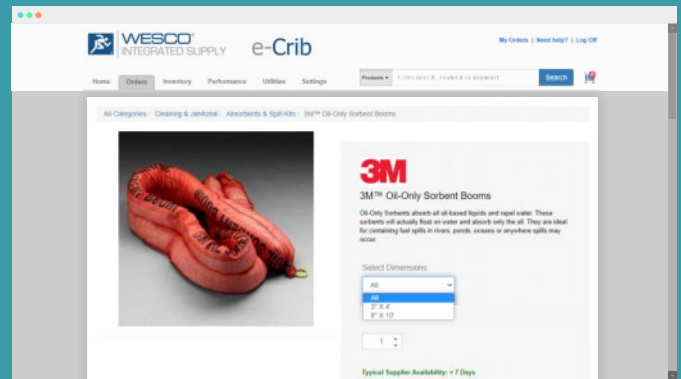

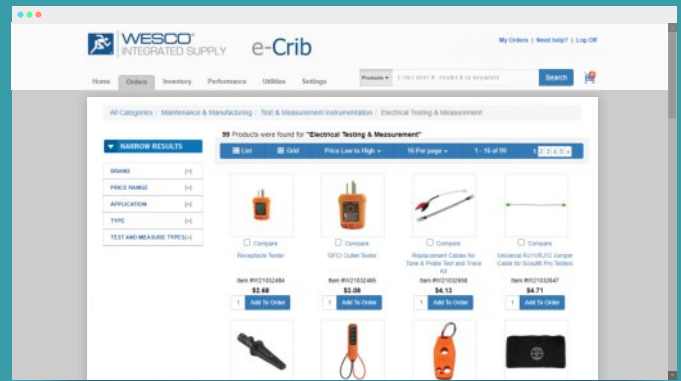

- Cleaning & Janitorial
- Electrical & Lighting
- Electronic & IT
- Industrial Machines, Machine Tools & Supplies
- Laboratory
- Maintenance & Manufacturing
- Material Handling
- Office Supplies
- Power Transmission & Fluid Power
- Plumbing & PVF
- Safety Equipment
- Structures, Building & Construction
- Tools & General Machinery

As of September 2021, over 330 manufacturers brands and 119,000 unique products are represented – and the numbers are expected to grow to over 150,000 products by the end of year!

e-Commerce Catalog Benefits

- Multiple platforms and dynamic accessibility integrate established order approval hierarchies and link work orders, cost centers, projects, and other custom and customer defined fields.
- Preferred Customer Contract Pricing accompanies multiple search and shopping experiences: by brand, category, part number or description.
- Access to Preferred Manufacturers and Vendors digital content, including Spec Sheets, Brochures, SDS and embedded video.

MORE+ SERVICES across your supply chain

Working as an extension of your organization, we will deliver tangible value to your bottom line by reducing total cost of ownership and streamlining supply chain management - from sourcing, to product enhancement, to online tools that help you make better decisions faster.
